Creo Parametric: Conversion

Version

Standard
Standard

No.:

PT-TRN-6217-EN

Audience

This course is intended for CAD users who would like to learn Creo Parametric and already have experience in other 3D CAD systems

Content

- Fundamentals of Solid Modeling 1
- Fundamentals of Solid Modeling 2
- Sketching Productivity Tools
- Part Design Intent and Reference Management
- Fundamentals of Assembly
- Fundamentals of 2D Drawing

Prerequisites

Knowledge of any type of 3D software, including an understanding of solid modeling, feature-based, parametric, and associative concepts.

Objectives

- This course gives you an overview of the various Creo Parametric functionalities.
- You will learn to accelerate your design process with the help of various design tools.
- The Creo Parametric design process includes modeling parts, creating assemblies and drawing.

For course duration and times, please refer to the respective course date on the website
